### **DETAILED ACTION**

This office action is a response to the amendment 7/3/2006.

#### ***Allowable Subject Matter***

1. The following is an examiner's statement of reasons for allowance: the prior art of record fails to disclose the claimed invention such as a pair of extended regions using an electron beam are formed from the first linear mask pattern that the pair of extended regions are positioned diagonal to each other. Hsiao teaches a process of etching part of an external region of a predetermined ferromagnetic tunnel junction region using a first linear mask pattern and etching another part of the external region of the predetermined ferromagnetic tunnel junction region using a second linear mask pattern which is intersecting with the first linear mask pattern. However, Hsiao fails to teach a process of forming a pair of extended regions using an electron beam from the first linear mask pattern that the pair of extended regions are positioned diagonal to each other. Therefore, it would not be obvious to modify Hsiao by adding any structure such as a pair of extended regions formed from the first linear mask pattern and positioned diagonal to each other, since doing so would destroy the structure of spin valve sensor of Hsiao.

2. Claims 18, 19 and 26-40.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
